|-----|--|
| 1) | In vitro susceptibility of Borrelia burgdorferi Levin, Nelson, Segreto, Harrison, Benson, Strle 1993, Antimicrobial Agents and Chemotherapy |
| 2) | Late and Chronic Lyme Disease 2002, Sam T. Donta |
| 3) | In Vitro Activities of Fluoroquinolones against the Spirochete Borrelia burgdorferi Kraiczy, Weigand, Wichelhaus, Heisig Backes, Schäfer, Acker, Brade, Hunfeld 2001, Antimicrobial Agents and Chemotherapy |
| 4) | Ursachen der Erreger-Resistenz bei antibiotischer Behandlung der Borreliose 2007, Walter Berghoff |
| 5) | In vitro and in vivo susceptibility of Borrelia burgdorferi Mursic, Wilske, Schierz, Holmberger, Süss 1987, Eur. J. Clin. Microbiol. |
| 6) | www.lymenet.de |
| 7) | In vitro activity of mezlocillin, meropenem, aztreonam, vancomycin, teicoplanin, ribostamycin and fusidic acid against Borrelia burgdorferi K. -P. Hunfeld, J. Weigand, T. A. Wichelhaus, E. Kekoukh, P. Kraiczy and V. Brade 2000, Institute of Medical Microbiology, University Hospital of Frankfurt |
| 8) | Zur in-vitro-Empfindlichkeit von Borrelia burgdorferi gegen β-Lactam-Antibiotika, Aminoglykoside, Ansamycine, Glykopeptidantibiotika, Fusidinsaure, Mupirocin und Fluorchinolone 2007, Judith Weigand (Homepage Universität Frankfurt) |
| 9) | In vitro and meropenem against Borrelia burgdorferi s.l. 2007, Rebecca Rödel, Alexandra Freyer, Thomas Bittner, Volker Schäfer and Klaus-Peter Hunfeld |
| 10) | In Vitro Activities of the Everninomicin SCH 27899 and Other Newer Antimicrobial Agents against Borrelia burgdorferi |
| a) | Pharmacokinetics and Tolerability of Gemifloxacin after Administration of Single Oral Doses to Healthy Volunteers Allen, Bygate, Oliver, Johnson, Ward, Cheon, Choo, Kim 1999, Antimicrobial Agents and Chemotherapy |
| b) | Antibiotika-Therapie, Klinik und Praxis der antiinfektiösen Behandlung Stille, Brodt, Groll, Just-Nübling 2004, 11. Auflage, Schattauer-Verlag |
| c) | "prescribing information" der Hersteller |
